FABARM USA is not your typical gun company. Passion for the outdoors and clay target shooting drives our entire team of professionals. We listen to our hunters and shooters and convey their messages to our engineers in order to push our products to be the best. We don't stop there, always asking "*what if*" while continuing to innovate and striving to make our shotguns even better.

Our products are made with the finest Turkish walnut and Italian steel using cutting edge technology. Melded together by artisans and craftsmen, the results are beautiful Italian shotguns designed to last under the most demanding environments. All backed by an extensive warranty and industry leading service. American hunters and shooters demand outstanding performance, and FABARM USA has answered their calls.

We ask that you visit your nearest FABARM USA dealer to see and feel the difference for yourself.

TARGET GUN

# XLR5 VELOCITY AR

1. Micro Metric™ adjustable stock allows the shooter to finely tune the stock for a precise fit.

2. Removable recoil reducer included standard.

3. Competition-tuned trigger for light, crisp trigger pulls plus a micro-adjustable trigger shoe to accommodate length-of-pull.

5. Frame available in Black Anodized or Titanium™ Silver.

4. Oversized bolt handle and bolt-release operating buttons give the shooter a positive feel.

6. Left-hand-eject model available.

7. Special stainless steel piston and enlarged gas ports for reliable function of light ammunition.

8. Alloy forend cap with weight-distribution system includes (3) 1.48oz. weights.

9. No tools required for Velocity rib to set point-of-impact from 50/50% to 90/10%.

## MODEL DESCRIPTION:

The Velocity is a shotgun that incorporates a long list of features never before available on semi-automatic shotguns – the most obvious is an adjustable point-of-impact rib, which is adjustable from a 50/50% to 90/10% pattern without the use of tools. The rib elevation is easily adjusted with a small thumb wheel at the muzzle end. This ramp-style rib starts at the rear of the action at 11mm wide and tapers to 9mm at the muzzle.

The Micro Metric™ adjustable stock complements the adjustable rib, allowing the shooter to fine tune the gun for the perfect fit. Additionally, the stock incorporates a shim system for adjusting drop and cast. Another first is the Velocity's adjustable trigger for length-of-pull. It is the first adjustable trigger ever to be designed into a semi-automatic shotgun. There is also a standard weight system built into the forend cap that allows the shooter to alter the weight up to 4 ½ ounces in 1 ½ ounce increments. These features make the Velocity extremely versatile.

Durability and reliability cannot be compromised in a target shotgun. Unlike many semi-automatic shotguns described as target models, the Velocity is designed specifically for target shooting. It is calibrated and chambered to handle only 2 ¾" ammunition. The gas ports, action spring and stainless steel piston are all calibrated to allow the Velocity to reliably handle light loads.

To reduce recoil and increase pattern performance the barrel is designed with a tapered bore known as TRIBORE HP™. The bore diameter at the chamber end is overbored to .740 inch and gradually tapers to .725 inch at the muzzle end. The EXIS HP™ choke tubes are 97mm long and utilize a hyperbolic internal design to match the performance of the barrel. Five chokes are included with the Velocity. Additionally, the bolt release and bolt handle are oversized for competition use. FABARM XLR5 Velocity AR – *Moving Forward Faster.*

## SPECIFICATIONS

Gauge:	12
Operation:	Stainless Steel Piston, Gas-Operated
Barrel:	TRIBORE HP™
Barrel length:	30", 32"
Chamber:	2.75"
Chokes:	5 EXIS HP™ Competition Choke Tubes
Frame finish:	Black Anodized or Titanium™ Silver
Stock:	Turkish Walnut with Adjustable Comb
Wood finish:	Matte, Hand Oiled
Weight:	8 lbs 4 oz.*
Case:	Hard Case
Proof test:	1630 BAR
Warranty:	5 years

\* Average weight without included recoil reducer and balancer weights.

TARGET GUN

1. Micro Metric™ adjustable stock allows the shooter to finely tune the stock for a precise fit.

4. Oversized bolt handle and bolt-release operating buttons give the shooter a positive feel.

3. Competition-tuned trigger for light, crisp trigger pulls plus a micro-adjustable trigger shoe to accommodate length-of-pull.

# XLR5 VELOCITY LR

2. Removable recoil reducer included standard.

5. Available in two grades – Black Anodized and Titanium™ Silver.

6. Velocity LR (Long Rib) concept adds 4 ½" to the sighting plane.

7. Left-hand-eject model available.

8. Special stainless steel piston and enlarged gas ports for reliable function of light ammunition.

9. Alloy forend cap with weight-distribution system includes (3) 1.48oz. weights.

10. EXIS HPTM Chokes come standard

## MODEL DESCRIPTION:

Once in a great while something comes along that is so obvious that it makes you wonder “*Why didn’t I think of that?*” The Velocity LR (Long Rib) concept is exactly that. We asked ourselves why a semi-auto barrel rib starts at the front of the receiver, a full 4 ½” farther forward than an over-and-under shotgun. Doesn’t that unnecessarily shorten the sighting plane? The answer is yes, but we can do better. The Velocity LR has an innovative ramp-style fixed rib that starts at the back of the receiver, giving the shooter the maximum-length sighting plane for better target acquisition and tracking. The bottom line: A better sight picture equals more broken targets.

The XLR5 Velocity LR combines all of the other groundbreaking innovations that made the XLR5 Velocity AR so popular. FABARM XLR5 Velocity LR – *Moving Forward Faster.*

## SPECIFICATIONS

Gauge:	12
Operation:	Stainless Steel Piston, Gas-Operated
Barrel:	TRIBORE HP™
Barrel Length:	30", 32"
Chamber:	2.75"
Chokes:	5 EXIS HP™ Competition Choke Tubes
Frame Finish:	Black Anodized or Titanium™ Silver
Stock:	Turkish Walnut with Adjustable Comb
Stock Finish:	Matte, Hand Oiled
Weight:	8 lbs 4 oz.*
Case:	Hard Case
Proof Test:	1630 BAR
Warranty:	5 years

\* Average weight without included recoil reducer and balancer weights.

TARGET GUN

2. TRIWOOD™ enhanced finish adds beauty and water resistance.

3. Oversized bolt handle and bolt-release operating buttons give the shooter a positive feel.

4. Revolutionary L4S assembly system creates a stronger structure, precise alignment, and eliminates forend movement.

5. Forend cap accepts optional L4S weight system to attach multiple 1.48oz. weights as desired.

# L4S SPORTING

6. Slender forend design makes handling like that of an over-and-under.

7. L4S features a Tapered Flat Rib.

8. Chrome-lined barrels and chambers.

10. Tapered TRIBORE HP™ barrel bores enhance performance while reducing recoil.

9. Target load tuned gas system for reliable cycling of light ammunition and soft shooting.

11. EXIS HP™ competition choke tubes with hyperbolic design to get the maximum performance from the TRIBORE HP™ system barrels.

1. Accepts optional Kinetik recoil reducer.

## MODEL DESCRIPTION:

If you believe a semi-automatic target shotgun should point and balance like a fine double gun with perfect balance and weight distribution, then the L4S is the gun you have been waiting for. The magazine is shortened to a four round capacity to reduce the length of the fore-end for improved balance. The L4S does not have an action spring in the stock and attaches with a simple stock bolt. This feature allows us to sculpt the pistol grip to eliminate the awkward feeling that affects many semi-auto shotguns. Because the L4S is designed for 2 ¾" target loads, the action is shorter than guns made to function up to 3 ½" cartridges, further enhancing the handling characteristics.

The L4S also incorporates a revolutionary new fore-end design that does not rely on wood to be part of the mechanical assembly of the gun. This removes all wiggle and movement in the fore-end that plagues all current semi-auto designs. Additionally, it makes the barrel to receiver relationship more precise and stronger while eliminating the forces that can damage and crack the wood.

The L4S includes all of the performance features our customers have come to expect from Fabarm target guns. The barrels feature our TRIBORE™ tapered bore, EXIS HP™ hyperbolic choke system and tapered top rib. All of the controls are extended competition style for better function. Recoil is extremely mild due to our target load tuned gas system.

A combination of innovative design features and a passion for making the best handling semi-auto target shotgun possible make the L4S the clear choice for your next day at the range.

## SPECIFICATIONS

Gauge:	12
Operation:	Stainless Steel Piston, Gas-Operated

# XLR5 WATERFOWLER

1. Rubber comb for added comfort.

2. Stock shim system to custom adjust fit.

3. Oversized trigger guard and oversized safety magazine cut off to accomodate bulky hunting gloves.

4. Oversized Bolt handle gives the hunter a more positive feel when operating.

5. Left-hand-eject model available.

6. Cerakote™ finish for added protection.

7. True Timber® Camouflage with a special Soft Touch finish.

8. Special PULSE PISTON™ allows the hunter to use target loads and 3" magnum loads interchangeably.

9. Velocity LR (Long Rib) concept adds 4 ½" to the sighting plane. Also, to reduce glare we have masked off the top surface of the rib to provide a camo free matte black finish.

10. INNER HP™ choke tubes with hyperbolic design to get the maximum performance from the TRIBORE HP™ system barrel.

11. EXIS DK™ choke fine tuned for non-toxic ammo in the most popular pellet sizes and red fiber-optic sight.

## MODEL DESCRIPTION:

Over the past few years FABARM XLR5 shotguns have taken the competition world by storm. A long list of technical features that have never been incorporated into semi-automatic shotguns combined with durability and reliability has made the XLR5 a favorite with target shooters. The engineers at FABARM are now applying the same philosophy to making a specialized waterfowl model. At the heart of the high performance XLR5 platform is the revolutionary Pulse Piston™ system that acts as a progressive brake thereby eliminating any valve system and allows for the function of varying types of ammo. This equates to a system that is simpler, contains less parts, is easy to clean and inevitably more reliable. Additionally, the braking of the pulse system progressively slows the action with heavy loads reducing felt recoil. Most significantly the reduction in recoil and enhanced reliability is achieved in what is the fastest cycling Semi-auto hunting gun on the planet at .31 of a second for five rounds.

To maximize down range performance we have incorporated our proven TRIBORE HP™ barrel design into the XLR5. This tapered bore allows for reduced recoil and improved pattern performance. We have even created a special competition choke tube, the EXIS DK, tuned for non-toxic ammo in the most popular pellet sizes. This choke in combination with the TRIBORE HP™ barrels allow the XLR5 to do what no other hunting shotgun can, use up to extra full choke without any negative effect on the firearm. As an assurance of strength and durability every FABARM XLR5 is tested by the Italian National Proof House to the highest possible rating of 1630 BAR.

If pure performance is the heart of the XLR5, the extensive list of user friendly features are the brains. The oversized trigger guard, safety, magazine cut off and extended bolt handle are purposely designed to allow for full control of the firearm with even the bulkiest winter gloves. The competition bred LR (Long Rib) concept has a top rib that increases the sighting plain by 4 ½" and allows the shooter to see down the rib with a more comfortable head-up posture. To reduce glare we have masked off the top surface of the rib to provide a camo free matte black finish and added a high visibility fiber optic front sight. Water and mud can destroy a shotgun quickly. To reduce the possibility of rust and corrosion the barrel extension and bores are chrome plated. We have also PVD coated the bolt, nickel plated the chokes and covered the external metal surfaces with camo to reduce rust. The synthetic stock is also coated with a Soft Touch camo process to create a rubberized feel.

## SPECIFICATIONS

Gauge:	12
Operation:	PULSE PISTON™, Gas-Operated
Barrel:	TRIBORE HP™
Barrel Length:	28", 30"
Chamber:	3"
Chokes:	3 INNER HP™ Choke Tubes + 1 EXIS DK™ with TrueTimber® camo
Sight:	Front red fiber-optic
Stock:	Synthetic
Stock Finish:	True Timber® Western Viper™ Camouflage + Soft Touch finish
Weight:	7 lbs*
Case:	INTEGRALE™ Case
Proof Test:	1630 BAR
Warranty:	5 years

\* Average weight with 30" barrels. Weight may vary based on material density.

# L4S HUNTER

2. Ergonomic bolt handle and bolt-release operating buttons give the hunter a positive feel.

5. L4S features a Tapered Flat Rib.

6. Chrome-lined barrels and chambers.

**KINETIK**  
FABARM KINETIK™  
RECOIL REDUCER SYSTEM

1. Accepts optional Kinetik recoil reducer.

3. Available in 3 grades: **Deluxe** as shown above, **Grey Hunter** (left), and **Initial Hunter** (right).

7. Tapered TRIBORE HP™ barrel bores enhance performance while reducing recoil.

4. Special PULSE PISTON™ allows the hunter to use target loads and 3" magnum loads interchangeably.

8. INNER HP™ choke tubes with hyperbolic design to get the maximum performance from the TRIBORE HP™ system barrel.

## MODEL DESCRIPTION:

FABARM USA introduces an innovative new line of semi-automatic shotguns designed for bird hunting. The new L4S family of shotguns exhibits the same high level of precision and finish that FABARM is famous for in a product that is competitively priced for the North American market.

The L4S incorporates an innovative new design that allows the forend to be removed without disassembling the shotgun. The design has two significant advantages. Removing the forend allows the action to be cleaned and lubricated without having to disassemble the whole gun. Additionally, it eliminates having the wood be part of the structural assembly of the gun, making the action and barrel relationship more accurate and stronger. Removing the stress from the wood forend also eliminates the forces that can damage and crack the wood. All grades will feature Turkish walnut with a matte oil finish.

The L4S is lightweight, making it a pleasure to carry in the field and has a gas operating system that significantly reduces recoil. It will handle every type of ammunition from 2 3/4" target to heavy 3" magnum hunting loads. Other notable features include a stock shim system for adjusting fit and TRIBORE HP™ tapered barrel for the ultimate in ballistic performance.

## SPECIFICATIONS

Gauge:	12
Operation:	PULSE PISTON™, Gas-Operated
Barrel:	TRIBORE HP™
Barrel Length:	26", 28"
Chamber:	3"
Chokes:	3 INNER HP™ Choke Tubes
Frame Finish:	Black Anodized – Grey – Nickel Plated on Deluxe
Stock:	Turkish Walnut – Semi-Deluxe (Grey) – Deluxe (Deluxe)
Stock Finish:	Matte, Hand Oiled
Weight:	6 lbs 5 oz. – 6 lbs 13 oz.*
Case:	INTEGRALE™ Case included with Deluxe and Grey Hunter. Sold separately for Initial Hunter.
Proof Test:	1630 BAR
Warranty:	5 years

\* Average weight without optional recoil reducer. Engraving and checkering styles, motif or colors may vary from products shown.

TARGET GUN

1. OPTIONAL: Micro Metric™ adjustable stock allows the shooter to finely tune the stock for a precise fit.

2. Accepts optional Kinetik recoil reducer.

3. Competition-tuned trigger for light, crisp trigger pulls plus a micro-adjustable trigger shoe to accommodate length-of-pull.

4. Adjustable forend mechanism to adjust action tension.

5. Heavy duty 43mm wide action ensures years of heavy use.

7. Tapered TRIBORE HP™ free-floating barrels enhance performance while reducing recoil.

8

8. EXIS HP™ competition choke tubes with hyperbolic design to get the maximum performance from the TRIBORE HP™ system barrels.

## MODEL DESCRIPTION:

When it comes to shooting the new Axis RS 12 Sporting in competition, you are being everything but Sporting. The Axis RS 12 is the whole package – balance, durability, good trigger, barrel performance, perfect stock dimensions, and low recoil. The Axis Free-Floating Barrels feature advanced TRIBORE HP™ tapered bores that lower recoil and reduce the need for excessively long forcing cones. Each gun comes with five EXIS HP™ choke tubes that have proprietary hyperbolic designs that are ballistic matches to the tapered barrel bores. The result is devastating performance down range with all types of shot sizes and velocities.

The Axis RS 12 action was purpose built as a target gun. The heavy duty 43mm wide action combined with a monolithic locking lug makes the Axis an extremely durable platform. The forend iron utilizes an adjustable mechanism to allow the action tension to be tightened at will for ease of service. An adjustable trigger features a light, crisp trigger pull. Stocks and forends are made from Turkish walnut and have a protective TRIWOOD™ finish. This finish gives an extra level of protection while adding beautiful grain to the stock and forend. All Axis stocks accept the optional FABARM KINETIK™ recoil reducer that is easy to install and remove to tune the balance of the gun. The FABARM Micro Metric™ adjustable comb and left-hand stocks are also available as options.

## SPECIFICATIONS

Gauge:	12
Barrel:	Free-Floating, TRIBORE HP™
Barrel Length:	30" - 32"
Chokes:	5 EXIS HP™ Competition Choke Tubes
Frame:	Steel
Frame finish:	Black Satin or Titanium™ Grey
Stock:	Turkish Walnut (Adjustable Comb is Optional)
Stock Finish:	TRIWOOD™
Weight:	8 lbs 4 oz.*
Case:	Hard Case
Proof Test:	1630 BAR
Warranty:	5 years

\* Average weight without optional recoil reducer.

# AXIS ALLSPORT QRR

## MODEL DESCRIPTION:

The Axis ALLSPORT is the world's most versatile target shotgun. It is designed for shooters who want one gun that can be configured for various styles and disciplines. Whether you shoot Sporting Clays, FITASC, Skeet or Trap – The Axis ALLSPORT has you covered.

Incorporated in this new gun is an extensive list of features that make the Axis ALLSPORT an outstanding value. At the top of this list is the unique Q.R.R (Quick Release Rib) design. By making the top rib easily interchangeable, the shotgun can be configured as a high rib Trap gun or a low rib Sporting model in just a few moments. The standard offering includes two ramp style ribs; one low with a 50/50% point-of-impact and a second 15mm high rib with 65/35% regulation.

The Axis ALLSPORT also includes our new TRIBORE™ free floating barrels for improved balance and performance. The Micro Metric™ adjustable stock comb allows the shooter to tune in the perfect sight picture. Additional features include the new 97mm EXIS HP™ hyperbolic choke tubes, integrated recoil reducer, adjustable trigger and durable TRIWOOD™ enhanced stock finish.

## SPECIFICATIONS

Gauge:	12
Barrel:	Free-Floating, TRIBORE HP™
Barrel Length:	30", 32"
Chokes:	5 EXIS HP™ Competition Chokes
Frame:	Steel
Frame Finish:	Black Satin
Stock:	Turkish Walnut with Adjustable Comb
Stock Finish:	TRIWOOD™
Weight:	8 lbs 6 oz.*
Case:	Hard Case
Proof Test:	1630 BAR
Warranty:	5 years

\* Average weight without included recoil reducer.

TARGET GUN

# AXIS RS 12 TRAP

1. Standard Micro Metric™ adjustable stock allows the shooter to finely tune the stock for a precise fit.

3. Competition-tuned trigger for light, crisp trigger pulls plus a micro-adjustable trigger shoe to accommodate length-of-pull.

**R** Release triggers available as an option in single release or double release.

4. Action tension adjustment mechanism in forend.

5. Left-hand stocks with and without adjustable combs are available.

7. Tapered TRIBORE HP™ free-floating barrel bores enhance performance while reducing recoil.

8. Point-of-impact easily adjustable between 50/50% and 90/10% high without use of tools.

2. Removable recoil reducer included standard.

6. Available as a combo set.

10. Available in either Black Satin or Titanium™ Grey receiver.

9. EXIS HP™ competition choke tubes with hyperbolic design to get the maximum performance from the TRIBORE HP™ system barrels.

## MODEL DESCRIPTION:

The FABARM Axis RS 12 Trap is designed to offer all of the leading competition trap-gun features at a price that makes it an unbeatable value. Free-floating over-and-under barrels, adjustable point-of-impact ribs on all barrels, tapered bores, integrated recoil reducer, adjustable comb and optional release triggers are just a few of the features. Additional features include new 97mm EXIS HP™ hyperbolic choke tubes, adjustable trigger and durable TRIWOOD™ enhanced stock finish. The FABARM Axis RS 12 Trap has you covered from the 16's to doubles and all the way to the "back fence."

This is all backed by a five year warranty and industry-leading service. The only thing not included is the guilt of paying too much. To find out more contact one of our Authorized Dealers today.

## SPECIFICATIONS

Gauge:	12
Barrel:	Free-Floating, TRIBORE HP™
Barrel Length:	32" Over Under – 34" Unsingle
Chokes:	5 EXIS HP™ Competition Chokes
Frame:	Steel
Frame Finish:	Black Satin or Titanium™ Grey
Stock:	Turkish Walnut with Adjustable Comb
Stock Finish:	TRIWOOD™
Weight:	8 lbs 14 oz.*
Case:	Hard Case
Proof Test:	1630 BAR
Warranty:	5 years

\* Weights may vary based on wood density.

TARGET GUN

# ELOS N2 SPORTING

## MODEL DESCRIPTION:

With the creation of the new ELOS platform, we set out to challenge ourselves to engineer the finest sporting clays competition shotgun possible – without compromise – code named “N2”. It must have new innovative features. The level of precision and fit must be excellent and unmatched durability. Very careful specifications were developed for balance and stock dimensions to produce the perfect handling characteristics.

The N2 barrels are deep drilled for perfect concentricity with the most advanced bore design of any production shotgun, TRIBORE HP™, a multi-step tapered bore that is proven to reduce recoil while significantly increasing pattern efficiency. The bore is finely plated with hard chrome for durability, rust resistance and ease of cleaning. The N2 has a ventilated mid rib that is truncated under the fore-end to reduce critical weight for improved balance. The top rib is a competition style flat 10 to 8mm tapered rib with a Bradley style bead and brass mid bead. On the business end of the barrel we included our high performance EXIS HP™ chokes with hyperbolic constriction to guarantee pattern performance.

The heart of the shotgun, the action, is driven by a reliable inertia trigger system that breaks cleanly at 3 lbs 10 oz. and can be adjusted for length of pull. We added an oversized top lever for comfort when shooting high volumes of targets. Of course the trigger is selective and the ejectors are automatic. Finally, the action is finished in soft satin to reduce glare and is enhanced with a contemporary scroll pattern.

The stock and fore-end are crafted from Turkish Walnut that is recognized as the highest quality wood for shotgun stocks due to its strength, high density, and fine grain. We finished the wood in a low luster oil that incorporates modifiers to improve durability and makes accidental scratches and dings easier to repair. The most innovative feature is our Micro-Metric™ adjustable comb that incorporates a new Dura-finish to reduce friction on the skin during recoil. Additionally, the N2 has the Fabarm interchangeable recoil pad that allows the shooter to purchase different length pads to customize the length of the stock without any gunsmithing.

With the N2 Sporting we have accomplished the challenge we set, to create the finest sporting clays shotgun possible without compromise. We almost forgot to mention the most innovative feature yet, all of this was done at a price nobody else can offer for a competition gun of this caliber (pun intended).

## SPECIFICATIONS

Gauge:	12
Barrel:	TRIBORE HP™
Barrel Length:	30", 32"
Chokes:	4 EXIS HP™ Competition Chokes
Frame:	Steel
Frame Finish:	Black Satin
Stock:	Turkish walnut (Adjustable Comb comes Standard)
Stock Finish:	Matte, Hand Oiled
Weight:	7lbs. 7oz.*
Case:	Hard Case
Proof Test:	1630 BAR
Warranty:	5 years

\* Weights may vary based on wood density.

# ELOS D2

1. Semi-Deluxe Turkish walnut with a hand rubbed matte oil finish.

2. Selective trigger and automatic ejectors.

3. Traditional game scene engraving on both sides of the action.

4. Ultra-lightweight.

5. Adjustable forend mechanism to adjust action tension.

6. Semi-Schnable forend shape.

7. Tapered TRIBORE HP™ barrel bores enhance performance while reducing recoil.

8. Chrome-lined barrels and chambers.

9. INNER HP™ choke tubes with hyperbolic design to get the maximum performance from the TRIBORE HP™ system barrels.

## MODEL DESCRIPTION:

As experienced hunters, we seek the fastest-handling over-and-unders that are easy to carry all day. The ultralight ELOS D2 is the perfect companion. Its sleek action and trim stock will ensure that you have the competitive advantage over the fastest game birds. As savvy consumers, we also want good value for our money. The ELOS D2 incorporates FABARM’s proven TRIBORE HP™ tapered bore and INNER HP™ chokes to ensure lethal performance down range. Elegant engraving of traditional game scenes and scroll work by fine Italian craftsmen round out the package. All backed by an extensive five year warranty and service that is second to none. Visit an Authorized Dealer now to learn more about the all new ELOS D2 – and our tradition of quality firearms since 1900.

## SPECIFICATIONS

Gauge:	12, 20 or 28
Barrel:	TRIBORE HP™

## FABARM – FIVE YEAR WARRANTY

In our desire to provide you with superior customer service in connection with your firearm, FABARM USA provides you with a five-year warranty from the date of purchase for your firearm. To benefit from this warranty, you will need to complete and return the Registration Card by certified or registered mail, or by filling out the Registration Form on our website within thirty (30) days of date of purchase. This warrants that your firearm is manufactured free of defects in material or workmanship which adversely affects the operation of your firearm. The warranty is non-transferrable and limited to the original personal retail purchaser and is subject to limitations. To read the full warranty disclosure please visit our website at [FabarmUSA.com](http://FabarmUSA.com)

## FABARM – BRESCIA, ITALY

The FABARM factory was launched around 1900 by the Galesi family, one of the great Brescian dynasties. The name FABARM comes from FABBRICA BRESCIANA DI ARMI, literally Arms Manufacturer in Brescia.

Today, FABARM has an extremely modern 10,000-square-meter factory located in Brescia, Italy, and a production capacity of almost 20,000 weapons per year. FABARM is dedicated to the total preservation of 100% Italian production, without recourse to subcontracting to countries with lower labor costs in order to provide customers with a superior product. FABARM has a massive investment in both its research and development and industrial facilities. FABARM also has a distribution network based on excellence in client relations and is distributed in over 50 countries. To listen better, to understand better, to provide better service, FABARM today has two subsidiaries, one in the USA and one in France.
